

Report: Water System for Anyana.
From: Samuel Saccsara Y
Date: 11/ 02/ 2007.

When I got there they had already constructed a water tank 2 meters by 3 meters to store the water. Now we need to hook up the pump and connect the water lines and run a pipe down to the river that will bring the water up the hill to the tank.

Thanks to the Lord Jesus for making this dream come true for the families of Anyana. When I arrived with the water pump they all were thrilled and said, “Now we can plant vegetables and fruit trees and there will be plenty to eat.”

The day we arrived was a holiday, All Saints Day, which all the Quechuas celebrate. For these families, it was a day of great rejoicing. Even crossing the river was no problem.

Pray for this man Isidro. He is one of those who has returned and desires to know the Lord and make Him known. He also wants to buy a water pump to water his land near the river.

To finish this Project we will need about \$200 more. The exchange rate of the dollar has dropped and the price of cement, bricks, plastic pipe, etc. in Ayacucho has gone up so that we couldn't buy everything that was needed when we wrote up the project. So please pray that the Lord will provide all that is needed. Thanks so much for your prayers and financial help.

P. Samuel Saccsara
